EDUCATION

University of Toronto

Expected 2023

Honors Bachelor of Science (HBSoc) - Computer Science

- **CGPA:** 3.86/4.00
- **Relevant Coursework:** Software Design, Data Structures and Analysis, Systems Programming and Software Tools
- **Honors:** Recipient of University of Toronto's entrance scholarship and an admission average of 95% (2019), Recipient of University of Toronto Scholars scholarship for the top 700 University of Toronto Applicants (2019)

EXPERIENCE

CAP Lab - University of Toronto

Toronto, Ontario

Deep Learning Programmer

May 2021 – August 2021

- Collaborated in a team to develop a neural network simulator to simulate language processing in Python and reduce lines of source code by ~4.5 times from a previous C implementation
- Worked extensively with NumPy and related libraries to vectorize matrix computations resulting in efficient feedforward/backpropagation algorithms and easily adaptable code

University of Toronto

Toronto, Ontario

Web Developer

September 2020 – April 2021

- Developed and updated a web application using React focusing on the efficient transfer of program details into a brochure format to manage program modifications and visualizations effectively
- Implemented a web application that allows employers to create job offer letters in bulk, customized for each recipient to accelerate the hiring process

PERSONAL PROJECTS

Price Analysis Web Scraper

Summer 2020

Python

- Extracted data such as product titles and prices (headphones) from a website using the beautiful soup library
- Interprets product prices and notifies user of dropping prices while tabulating the data for future analysis

Social Media Manager Chrome Extension

Summer 2020

HTML/CSS/JavaScript/JQuery/JSON

- Allows users quick access to their favourite social media platforms and gathers them into one place using customizable user settings through local storage

Discord Bot

Summer 2020

Node.js

- Uses discord.js to allow users to use lotteries, polls, manage deleted and edited messages and solve complex math problems efficiently using recursion and simple server commands in order to meet server needs

EXTRA CURRICULARS

DEEP Summer Academy

Toronto, Ontario

Student

Summer 2018

- Strategically designed and developed full-stack web components in React and web-based games using JavaScript
- Used Python libraries to implement efficient solutions to a variety of computational physics problems

TECHNICAL SKILLS

Languages: Python, Java, C, SQL, HTML, CSS, JavaScript, R, Assembly

Technologies/Frameworks: Node.js, Pandas, Matplotlib, NumPy, React, Bootstrap, Git, PostgreSQL
